

5 NEW SALES OF LINETIME'S LEADING LEGAL SOFTWARE

The Country's Number ONE Legal IT Software Supplier has expanded the number of users of its award winning legal software suite LIBERATE as five more leading firms decide to adopt LINETIME as their preferred supplier.

Linetime Liberate users benefit from a wide spectrum of features and benefits covering practice, case and matter management.

The latest firms to invest in this feature rich award winning legal software include:

Thomas Simon – Cardiff, **Quantrills** – Ipswich, **The Waterfront Partnership** – London, **Rogers & Norton** – Norwich & **William Graham Law Limited** – Cardiff

These five new Liberate users all chose the Linetime software following detailed evaluation of the market, with special reference being made to this year's **Law Society Software Solutions Guide** and Linetime's ranking as the country's **Number 1 Voted Supplier**.

Two of these new Liberate users were long time Linetime customers who after surveying the market decided that their original choice of software supplier had been well and truly justified.

The company's reputation for high quality customer service, the functionality of the software and the innovative way in which it has developed, with, for example, the adoption of .NET and SQL server technologies, has had a significant influence on why these new users opted to choose Linetime over any of the alternative suppliers.

Other comments made by these new users included the fact that Liberate's management reporting was excellent and that there were real tangible benefits to be gained from the use of its billing wizard and document production facilities. The fact that Liberate was designed as a complete system based on one SQL database was also a significant factor why these six firms chose Linetime.

Background:

Linetime is the country's leading Legal Software Company - Law Society Software Guide 2007.

It was founded in 1983 following an MBO from a large UK computer company. Since then they have focused entirely on the development of software and systems for the legal marketplace.

Since its formation **Linetime** has developed **Practice Management and Case Management systems** as well as niche products for debt recovery – **Debttime** is an acknowledged market leader in its field.

Linetime's latest product **Liberate** was the first truly integrated legal software suite available to the UK legal sector. Operating in a Microsoft SQL Server environment customer shipments began in July 2001. The many benefits of the single database approach have resulted in the development of comprehensive Customer Relationship Marketing facilities (**Liberate Contact Marketing**) and many sophisticated reporting tools (**Liberate Report Generator and MyView.NET**). **Linetime** was the first legal software supplier to be recognised by Microsoft as .NET specialists, and receiving appropriate accreditation.

Liberate Express is an exciting new document and matter management system. **Express** can be used in harmony with the rest of **Liberate** but caters for the non-procedural "ad-hoc" worker and assists compliance and adherence to standards across all desks.

LIBERATE

Is a complete suite of software for the legal profession. At its core is a single Microsoft SQL Server database that ensures the modular system works as one, unlike the alternative approach of "bolting together" disparate software from disparate suppliers. Although **Liberate** is a complete solution the individual modules can be purchased separately and added to later without compromising the overall investment in a complete product.

Using **Microsoft .Net** technology we are able to take advantage of integration with leading specialist third party software providing real benefits to the user in such areas as Digital dictation, Postcode look up and Client Identity confirmation.
