

Greenland Houchen Pomeroy have chosen Liberate from Linetime for their new Matter and Practice Management Systems.

Although Greenland Houchen Pomeroy is arguably the oldest firm in Norfolk with parts dating back to 1751. The firm have long recognised the need to stay at the forefront of technology in assisting them to provide the best in client service. Operating from 5 offices the firm offers a wide range of services to its commercial and private clients.

In selecting Linetime James Knight, Practice Manager commented, "We had lost confidence in our current suppliers and looked at the top ten in the Law Society's Software Solutions Guide. This was reduced to a shortlist of five for in depth investigation.

We were impressed by the knowledge and quality of presentation displayed by the Linetime people and the flexibility of the software to grow in line with our business needs."

Following a data conversion from the current AIM system, Liberate will be rolled out to all 90 staff within the firm.

Tony Klejnow Linetime's Managing Director "We are committed to keeping Liberate at the forefront of legal technology with our early adoption of the Microsoft .NET platform and are delighted that this has been recognised by the firm in choosing us."

Background:

Greenland Houchen Pomeroy is an East Anglian based firm of solicitors who provide a broad range of legal services to their clients from offices situated throughout Norfolk.

The firm's strength is in offering a modern, efficient and personal level of service to our clients, which is also competitive on price. Greenland Houchen Pomeroy acts for a number of large organisations within the region, but also maintains a strong client base of individuals and families.

Linetime develop, supply and support integrated IT solutions for the legal profession. Quality is our hallmark, from software design, development and support, to our dedication to installation, training and customer service.

Liberate from Linetime is a complete suite of software for the legal profession. At its core is a single Microsoft SQL Server database that ensures the modular system works as one, unlike the alternative approach of "bolting together" disparate software from disparate suppliers. This alternative is also known as "Best of Breed", however, we believe that **Liberate** provides "Best of All" in its holistic approach to the challenges of the modern legal firm.
