

HI HO SILVER - AWAY

“October 1st sees the start of our 25th year in business, a significant milestone in any company’s history especially one involved in the rapidly changing world of IT”

John Burrill, Linetime Founder and Chairman.

Linetime Limited was founded following an MBO from a large UK computer company. It began by marketing an existing product for the legal marketplace written in the popular Basic programming language. As new technology became available the company became early adopters ensuring that they kept pace with both the market and available technology.

This philosophy still persists with their current award winning product **Liberate** being written using the very latest development tools and based on a single SQL database.

John Burrill again “We’re justifiably proud of the fact that from relatively humble beginnings in an old Mill in Leeds we have progressed to our stylish training and development facility in Yeadon, home to our excellent team of: software developers, trainers, support personnel, administration and sales & marketing professionals.

“It’s down to these people that we are now recognised by this year’s Law Society Software Suppliers Guide as being the **Number 1 legal software company in the country.**

“In addition our **DebtimeSQL** product is the market leader within Debt Recovery specialists.

“Our latest product **Liberate** was the first truly integrated legal software suite available to the UK legal sector. Operating in a Microsoft SQL Server environment, customer shipments began in July 2001. The many benefits of the single database approach have resulted in the development of comprehensive Customer Relationship Marketing facilities (**Liberate Contact Marketing**) and many sophisticated reporting tools (**Liberate Report Generator** and **MyView.NET**).

“We are also very proud of the fact that **Linetime** was the first legal software supplier to be recognised by Microsoft as **.NET specialists**, and receiving appropriate accreditation.

“One of the many things that separate us from our competitors is our insistence on training as an integral part of the investment customers make in our products. Excellent training ensures that the user obtains the maximum benefit from the system, so it is no coincidence that we still service many of our existing customers 25 years on!”
