

INCREASED SALES LEADS TO LEEDS' TRAINING CENTRE EXPANSION

Linetime, the country's leading supplier of Legal Software, has reported the opening of a new facility at their Leeds Training Centre. Due to the continued growth in new users of the company's award winning software **Liberate**, Linetime has added another fully operational training room to their existing Education Suite at their Leeds HQ.

Equipped with the latest multi-media presentation technology and networked computer systems, this new training facility will help Linetime maintain its excellent reputation as it continues to meet the very strict requirements of the prestigious National Training Foundation. Linetime was accredited by the Training Foundation following the company's adoption of the **Trainer Assessment Programme (TAP)** and the **TAP training methodology**.

The **TAP** accreditation is an industry standard Qualification awarded by the Institute of IT Trainers via the **Training Foundation** (*a recipient of the Queen's Award for Enterprise*). Linetime's software training courses now qualify for CPD points under the Law Society's Continued Professional Development initiative.

Tony Klejnow Linetime's MD said, "We put great store in our commitment to training, which I'm pleased to say has been recognised every year by the **Law Society's Software Solution Guide**. We believe that it is crucial that customers understand the importance of receiving high quality and comprehensive training on all aspects of our software to ensure that they gain maximum benefit from their investment.

"Over the years we have invested significantly in what is now undoubtedly one of the best legal software training teams in the country, working in a world class training facility with all the physical infrastructure necessary to deliver the highest quality customer training."

Background:

Linetime is the country's leading Legal Software Company - Law Society Software Guide 2007.

It was founded in 1983 following an MBO from a large UK computer company. Since then they have focused entirely on the development of software and systems for the legal marketplace.

Since its formation **Linetime** has developed **Practice Management and Case Management systems** as well as niche products for debt recovery – **Debttime** is an acknowledged market leader in its field.

Linetime's latest product **Liberate** was the first truly integrated legal software suite available to the UK legal sector. Operating in a Microsoft SQL Server environment customer shipments began in July 2001. The many benefits of the single database approach have resulted in the development of comprehensive Customer Relationship Marketing facilities (**Liberate Contact Marketing**) and many sophisticated reporting tools (**Liberate Report Generator and MyView.NET**). **Linetime** was the first legal software supplier to be recognised by Microsoft as .NET specialists, and receiving appropriate accreditation.

Liberate Express is an exciting new document and matter management system. **Express** can be used in harmony with the rest of **Liberate** but caters for the non-procedural "ad-hoc" worker and assists compliance and adherence to standards across all desks.

LIBERATE

Is a complete suite of software for the legal profession. At its core is a single Microsoft SQL Server database that ensures the modular system works as one, unlike the alternative approach of "bolting together" disparate software from disparate suppliers. Although **Liberate** is a complete solution the individual modules can be purchased separately and added to later without compromising the overall investment in a complete product.

Using **Microsoft .Net** technology we are able to take advantage of integration with leading specialist third party software providing real benefits to the user in such areas as Digital dictation, Postcode look up and Client Identity confirmation.
