

ANNOUNCEMENT

pdfDocs delivers more for a lot less

Law firms in Europe are turning to the pdfDocs Solutions Suite to manage their business-critical documents and to standardise PDF creation, document comparison, metadata management, CD Bibles and OCR imaging workflow across their firms.

HOW MANY OF THESE BENEFITS WOULD BENEFIT YOU?

The pdfDocs Solutions Suite offers law firms like yours the following benefits:

PDF made easy: Create industry-standard PDF files with drag-and-drop ease. Combine documents from different applications into a single, secure PDF. Edit, mark up, and redact PDF files. Automatically split PDF files based on size or page number. Apply Bates stamps. And much more.

CD Bibles : Combine PDF and non-PDF documents into a single "electronic PDF book" complete with interactive table of contents, bookmarks, and links. Create templates to further reduce your workload.

Compare Anything: Compare Word to Word, PDF to PDF and even Word to PDF. Identify changes and output them directly to Word or PDF. No proprietary viewing technology. No more reformatting documents. This seamless, integrated document comparison workflow delivers accuracy and efficiency.

Digital Forms: Create and manage PDF forms. Speed up processing and increase legibility by typing directly in forms. View, edit, save, and digitally sign and distribute forms in a format that is safe, secure and universal.

Scanner-Friendly: Convert scanned image files to searchable PDF documents or to Microsoft Word and

never retype another document again.

Secure Documents: Reduce risks in distributing sensitive information by cleansing documents of harmful metadata. Cleanse 19 metadata types in Word, 24 in Excel, and 15 in PowerPoint with just a few mouse clicks.
